

BIO	I work at the intersection of behavioural insight, product design, and AI, taking products from research and design through to functional development.	
EDUCATION	Uppsala University 2025 - 2027 (expected)	Master's in Human-Computer Interaction Honors: Recipient of the Terseri, Albin, & Wallqvist Scholarships Key Focus: Interaction Design, AI & Emerging Tech, Research
	University of Lagos 2018 - 2022	Bachelor of Science in Psychology Honors: Recipient of the University of Lagos Merit Scholarship Key Focus: Behavioral Psychology, Research Design, Cognition
EXPERIENCE	Product Development Trainee F1RST TECH Programme 09/2026 - 12/2026	Technology programme with Lovable, H&M and EY, focused on AI-assisted product design and development, innovation, and real-world problem-solving, concluding with a national hackathon with students from Uppsala University, KTH and Chalmers.
	Product Designer & UX Researcher Independent Practice 09/2025 - Present	Conduct UX research, design, and AI-assisted development across the product lifecycle, from user interviews, wireframing, UI design, and prototyping to usability testing and functional implementation. Work across academic teams, delivering 7 cross-domain design projects from ideation to validation, including commissioned work for a natural history museum and a women's shelter. Developed and shipped Landa, an AI-powered decision-support tool for international students moving to Sweden, integrating the Claude API for personalised guidance and serving 500+ users. Designed and deployed an interactive sustainability discovery system prototype for Biotopia Uppsala, combining data visualisation, a location-based map, and contextual guidance to help residents connect to Uppsala's sustainability infrastructure. Coordinated UX research protocols with 25 multinational participants, leading to evidence-based design directions.
	Research Intern University of Lagos 02/2025 - 07/2025	Designed behavioural research protocols, coordinated participant recruitment, and maintained data privacy compliance. Analysed qualitative and quantitative data from 200+ participants to identify patterns and synthesised findings into clear recommendations for stakeholders.
LEADERSHIP	Chair, CHIA Uppsala University 08/2026 - Present	Lead the HCI student association at Uppsala University, coordinating activities, facilitating member engagement, and managing stakeholder relationships across academic and organisational initiatives.
	Student Representative HCI, Uppsala University 09/2025 - Present	Represent 30+ design students, gathering feedback on course quality, recurring pain points, synthesising responses into clear themes, and presenting actionable recommendations to programme leadership.
SKILLS	Design & Research AI & Development Project Management	Figma, ProtoPie, Hotjar, Miro, Maze, SPSS, Orange Data Mining API integration, RAG, Prompt Engineering, Codex, Claude, Lovable Trello, Notion, ClickUp, Jira
